
PROCLAMATION

Let it be known that on this day June 1st, 2022, I, Michael A. Dennis of Casa Arkansas creator of the Winston Project hereby do proclaim and declare that the formation of Winston Holdings & Trust an autonomous trust organization be formed as described with in this trust instrument and hereby being known as the Winston Holdings & Trust Company, AKA "Winston", or "the company" or "the trust". This instrument will detail and act as the governing body for the trust company and will serve as the ruling instrument when considering proposals, changes, and other matters that will steer how Winston Holdings & Trust will be utilized, implemented, build value, and accomplish our core mission and goals outlined by the procedures described within the instrument. The instrument, its pages, and the assets, technology, and intents are designed and designated to be hereby held in trust as described in the instrument. No other statements, agreements or otherwise shall be held between Winston Holdings & Trust and any other agent, company, or entity without a proposal duly elected by and enacted in accordance with our governance procedures.

A large, abstract graphic element is positioned in the center of the page, consisting of several overlapping, rounded, dark blue shapes that resemble a stylized 'W' or a fan.

Paper

Wednesday June 1st 2022

Issue # 1

Core Mission:

Our core mission is to bring decentralized financial services to every person and to help build better education around blockchain technology.

Mandate:

Winston Holdings & Trust's mandate is to build and expand on tools that aid the common person in utilizing decentralized finance in their everyday life.

Public Notice:

All Trust Board meetings must be held in a public forum and have a 30 day notice prior to the date of the meeting. All meetings must be announced in the Discord Server as well as on <https://winston.services/public-notice>

The Whitepaper

Winston Services

Today millions of users are into the blockchain space. From your average collector to your extreme investor cryptocurrency and blockchain has developed into one of the premier fields to work and invest.

A few years ago, a group of developers produced what today has become a worldwide process for computational security in finance. At the start it did not seem important, many opposed the idea of a digital financial system that was not tied directly to the traditional banking system.

Winston Holdings & Trust

Blockchain Aggregation.

"In the know" the who, what, when and why of Winston

With the high demand for quality projects related to blockchain, as well as the high fees involved in transactions using traditional blockchain transactions. Winston was created to be a service that allows the common individual to get involved with blockchain technology.

One of the first things I noticed was I could not even send out \$5 dollars on Ethereum without it costing me \$50 additional bucks in fees. Outrageous, and not a viable solution for everyday money handling procedures.

While you are within the Winston network, we never charge a fee. With fast transactions, written to a blockchain, as well as a non-custodial multi-coin wallet you are always in control of your assets.

*See Fee Structures

Winston network is comprised of various chains and the Winston blockchain. A complete JavaScript Smart Contract enable blockchain that operates like a lightning network.

Feeless Trading

Winston Trading

The future of finance.

One of the foundations of blockchain is the ability to decentralize the financial services related to traditional banking. Winston's lightening network is a feeless network that works with multiple chains.

Learn to Earn

Winston Academy

Designed to Educate the future.

Learning is a fundamental issue in every society. Every college or higher education platform charges for you to learn, Winston is going to change that. Winston Academy offers free classes.

Crypto Payments

Winston Merchant Services

Digital Asset Management.

When it comes to technology; Winston is breaking the norm and utilizing the future of technology in many ways. A smart AI to help with your blockchain related tasks and features.

Winston Services

Your Personal Assistant To Blockchain Technology.

Leading the future in delivering blockchain assets for merchant acceptance.

With the dawning of a more robust digital financial system people have been looking for a standard in blockchain technology and a straightforward way to understand and undertake the process of getting involved in the blockchain era.

Introducing Winston, your personal assistant to Blockchain. Winston services offers a full line of blockchain related services to help the average individual as well as the savvy investor learn and earn crypto while having the tools to do more with your digital assets.

With Winston services you have access to over 16 of the most popular blockchain cores, as well as connections to hundreds of tokens. Each accessible through Winston Services.

One of the biggest struggles in blockchain communities happens to be creating the contracts themselves. With the ability to code about any logic into a smart contract, finding someone capable of writing the contract is usually half the battle.

With Winston's Blockchain Wizard you can create your own contract in minutes with just a few simple clicks. Once the contract is created you can simply publish it to any of the connected smart contract chains or have it converted to the Winston Blockchain.

You now have the tools to build the future of Blockchain Technology.

Connecting you to blockchain technology one bridge at a time.

Built to interact with the growing influx of blockchains and new blockchain related technologies Winston is designed to reduce the overall cost of transacting in the blockchain environments.

Winston Trading

Feeless Trading

Why should you have to pay a fee every time you want to hand someone five dollars? We do not think you should. So, when you utilize the Winston network you relieve yourself of many of the traditional fees associated with traditional banking as well as eliminate the various fees associated with blockchain transactions.

Say "NO" to the fees.

With over sixteen networks connected and a lightning layer bridging them together, decentralized finance is at your finger tips. Winston Blockchain is built with ZERO fees. You can move your money around where you want it without costing you the traditional fees that are charged per transaction. Utilizing Winston you only pay when you move assets on to the network or off of the network.

Crypto Payment Gateway

A global crypto payment platform.

When it comes to accepting crypto; there is no other platform today that offers an all-in-one solution for crypto currency payment acceptance.

Until now.

Winston Merchant Services has a full line of utilities to aid your company in transacting in the new decentralized financial world.

Take it one step further and offer your very own white label version of the Winston cryptocurrency card.

Offer your customers the choice of traditional payments or the future of Decentralize Finance, Cryptocurrency.

Winston Merchant Services

Winston Mining

Mining Services

The latest updates

Everyone who is knowledgeable, knows that the way to earn crypto is through mining. With Winston Mining services we open the doors to everyone to learn about mining and become a part of earning in the digital future.

With services that including Mining equipment sales and rentals to new and existing mining pools for multiple tokens and coins.

As well Winston will have mining operations across the globe to add to the value of Winston Holdings and Trust as well as build on our platform.

Investing in our services not only grows our products but it grows our value in the community as we become a leading example of decentralize finance.

Rent our miner, or setup a mining pool on a new coin for minimal fees. We resource equipment and electricity to facilitate a profitable return for our Investors.

Every new coin created with the Winston Blockchain that has the capability to mine will be able to setup a mining pool for their new coin.

Earning Made Easy

Earning beyond traditional investing.

Winston Staking is a one-of-a-kind platform to earn rewards based on community donations and participation.

While Winston Staking is not a traditional staking platform it is more in line with the traditional savings accounts.

With a thirty-day vesting period and rewards based on the size of the community pools. You can earn just by holding your coins and tokens in the Winston Network.

Winston Staking

Winston Academy

Education Paved For The Future.

Not your traditional online academy.

With traditional college costing thousands of dollars for many the opportunity to gain experience in a higher-level education system is just not in their cards. Some have spent years and thousands of dollars to find out they have a useless piece of paper and now must go and learn something new to be relevant in today's job market.

As well the traditional college is riddle with scandals with what many would consider the ways of the past. With the future of blockchain technology evaluating its boundaries Winston is the first education platform to offer graduation NFT Certificates.

Our platform is the first of its kind to not only pay our teachers but pay our students for learning all in cryptocurrencies.

Teachers are encouraged to post content so that students can learn. As their posts educate students, our teachers are paid in crypto rewards.

Students earn by completing course and passing the quizzes that accompany each lesson.

Teachers and Students help build the future while earning.

Education is one of our top priorities with Winston services. Having a place to learn as you grow in the blockchain community is a crucial step. We want to help you with the tools that will make the future of decentralize finance a possibility for everyone no matter your background.

JavaScript Multi-Segment Blockchain

A lightning network to reach the globe.

Created to work in a JavaScript environment without the by products of a coin or the use of fees the Winston Lightening Network Blockchain enables its users to connect in a secure manner with hundreds of coins without the per transaction fees.

Reaching global transaction levels Winston network can connect and supply payment channels that will lead the industry in decentralized financial options. With processes setup for community and banking needs that suite the requirements of societies around the globe.

When Winston Blockchain was first created, it was created to help reduce the fees in trading crypto, since then it has grown into a platform to help educate others on the utilities behind blockchain technology.

The blockchain itself is written completely in JavaScript and utilizes the NodeJS platform to create a Smart Contract environment like no other.

Winston

Winston Smart Contracts are written in JavaScript. This means hundreds of developers already exist in the field of development to create the next step in cryptocurrency.

The same blockchain is used as a layer bridge to manage data within Winston network. By utilizing the blockchain as a data storage mechanism allows us to secure data across the globe.

“Hey @Winston”

Michael A. Dennis - Founder

Imagine one day walking into your favorite store to see Winston Accepted here. With the Winston network we are driving the push to cryptocurrency acceptance by offering a solution for merchants as well as blockchain enthusiast all in a transparent layer of blockchain technologies.

Utilizing the Winston feeless network reduces the cost of moving money around and reduces the current struggles of moving your money from one location to another legally. Winston allows you to accept crypto and exchange it for your country currencies.

Winston Holdings and Trust

A for profit decentralized trust organization.

Winston Holdings and Trust is run by a Board of Caretakers. These are elected officials that are bound by the by-laws, ordinances, and oath of office as described in the Trust Charter.

The voting process as described in the charter will be used to approve business operations for the trust as well as manage board members, their wages, and the overall budget and management of Winston Holdings & Trust assets and interests.

Helping finance build back trust in doing business, Winston Holdings and Trust was created to help those who want to utilize crypto through a decentralized trustless process.

Winston Holdings and Trust was formed by Michael A. Dennis and a few other partners who believe that blockchain is the future of digital asset management.

For us to fund the programs, features, and public resources we have described here and elsewhere we have developed two digital assets, as well created a custom blockchain network, and have various revenue streams in place to continue growing.

Winston Holdings & Trust's day to day operations are ran by those individuals, partners, and contracted business associates appointed by the Board of Caretakers, and will be bound by the contracts developed by the board and approved through our governance processes as described in our Charter.

The trust assets start with Winston and his codebase, logo's brands, images, artwork, websites, mobile and desktop apps that are currently being developed as well as any future projects or assets we may acquire through time and space.

“Trustless is the best trust”

Michael A. Dennis - Founder

We started with Winston as a simple blockchain bot. Since Winston has grown in to a network of computer programs that work together to perform the actions that make up Winston's netowrk. As Winston has evolved, he was developed to have the ability to gradually learn new processes. We have enabled Winston to connect to various blockchains and other API services. On top of this network, we have created the Winston and the Ahwa token both on the BSC network.

Winston token represents that share of value we raise with in the trust through our revenue streams. We use our vehicle tokens and pair them to revenue. These tokens are then paired directly to Winston in which we encourage our community to upgrade their vehicle tokens in to Winston tokens. A few lucky people will have a chance to upgrade thier Winston Tokens in to voter shares, these shares are represented by Ahwa. Each 1.0 Ahwa represent a vote with in our governance process.

Ahwa is used with in our voting system and makes up the voting power within Winston Holdings and Trust. Every 1.0 Ahwa represents one vote within any proposition brought to the voters. Any Ahwa holder has the right to bring forth a proposal if they have held at least 1.0 Ahwa for a full bi-annual period.

Governance

Ahwa Token

Ahwa token holders are the representative voters and make up the accumulated voting power of Winston Holdings & Trust. The accumulation of 1.0 Ahwa coin represents the power of one vote within Winston Holdings & Trust governance procedures.

Caretaker Nominations

Ahwa token Holders who have 1.0 Ahwa tokens and maintain that balance for the current period of the semi-annual board meetings(6 mo) can cast a nomination.

Caretaker Elections

The Board of Caretakers are elected and may also be removed from office by a 2/3 majority vote. Each Caretaker is limited in term to no more than two five year periods in their lifetime.

Propositions

Ahwa token Holders who have 1.0 Ahwa tokens and maintain that balance for one period of the semi-annual board meetings(6 mo) can create a proposition for the voters to consider.

Trust Operations

All trust business must be presented in a proposition and be enacted with a 2/3 majority vote in order for it to be adopted as part of the day to day operations of the trust. Those day to day operations that ensure the continued operations of the trust are the responsibilities of the Board of Caretakers.

Board of Caretakers

The board of caretakers will be elected through the governance process and carry the responsibility of representing the beneficiaries of the trust to the best of the elected caretakers abilities. The following positions were setup to help organize, manage, and run the day-to-day operations of the trust and to enable continue revenue growth.

Chairperson

The Chairperson will be tasked with managing not only the company image, accounts, employees, the vision and core mission of the company but must also represent the trust with full faith and duty to carry out the core mission. The person elected as Chairperson will require 2/3 of votes to be elected or removed from the position.

Vice Chairperson

The Vice Chairperson is tasked with assisting the Chairperson as needed to achieve the core mission and fulfill the operations and management of the trust but must also represent the trust with full faith and duty to carry out the core mission. The person elected as Vice Chairperson will require 2/3 of votes to be elected or removed from the position.

Secretary

The Secretary will be tasked with managing the company accounts, employees, and to assist the Chairperson and Vice Chairperson as needed to achieve the core mission but must also represent the trust with full faith and duty to carry out the core mission. The person elected as Secretary will require 2/3 of votes to be elected or removed from the position.

Treasure

The Treasure will be tasked with managing the company financial accounts, assets, and to assist the Chairperson and Vice Chairperson as needed to achieve the core mission but must also represent the trust with full faith and duty to carry out the core mission. The person elected as Treasure will require 2/3 of votes to be elected or removed from the position.

These four positions above will act as the governing body of the trust company. These elected positions must first be nominated, and then elected by the vote holders as described in our community governance process and are bound by our Oath of Office. Each proposal for these positions must have 2/3 of the vote to win and be enacted into the company policies and procedures.

Winston Academy

Board of Educators

The Board of Educators consists of 7 appointed positions. These educators from around the globe who currently are educators in their regions of the world will represent and carry out the decisions and priorities of the Board of Caretakers. The Board of Educators will be responsible for the overall curriculum and structure of the Winston Academy and will help to bring our core mission to life by helping bring decentralized finance to the common person through quality and engaging education and the Winston Academy.

Chairperson

The Chairperson will handle the overall management of staff and the overall day-to-day operations of Winston Academy. The Chairperson along with the other Board of Educators will be responsible for managing the core curriculum of Winston Academy to support our core mission to bring decentralized financial services to the common person.

Vice Chairperson

The Vice Chairperson will assist the Chairperson with the overall management of staff and the overall day to day operation of Winston Academy.

Secretary

The Secretary will be responsible for the general documentation, administrative and duties as required to assist the Chairperson and Vice Chairperson manage the day-to-day operations of Winston Academy.

Treasure

The Treasure will be responsible to managing the revenue, the accounting, payroll, budgets, and are responsible for submitting these details to the Board of Caretakers, and the Board of Educators for Winston Academy.

Dean Of Education

Dean of Education and the Assistant Dean of Education are directly responsible for the curriculum and student overall success. The Dean of Education will work directly with the Board of Caretakers to expressly deliver on our core mission to bring decentralized financial services to the common person.

Assistant Dean of Education

The Assistant Dean of Education will assist the Dean of Education with the curriculum and student overall success. The Assistant Dean of Education will work directly with the Dean of Education to expressly deliver on our core mission to bring decentralized financial services to the common person.

Dean of Student Success

Dean Of Student Success will be responsible for the relationship management and making sure every student has a chance to be successful. The Dean of Student Success will work directly with the students to ensure they have every chance at success.
